## WHOOPDEDUPE INTRO:

Membership files and other contact lists typically contain numerous duplicates and other data issues. Duplicates are often difficult to identify because of typos, nicknames, changed last names, changes of address, etc. WhoopDeDupe will quickly and easily clean up your lists and identify your duplicates with only a few clicks. Even if your lists are non-standard data files such as Word labels, simple typed lists, copied lists or OCR scanned lists, WhoopDeDupe can usually process these files in a flash. WhoopDeDupe can combine many files and file formats together into a single list with only one click every time. If you need to find matching persons in multiple lists, there is no better solution. WhoopDeDupe has been compared to alternative products, and the match rates from WhoopDeDupe are always higher and the results are always significantly more accurate.

The Service Employees International Union (SEIU) uses this software to process a high volume of data files daily. In December of 2009 SEIU wrote:

***"It works ridiculously well."***

## WHOOPDEDUPE DEMO:

To find out what WhoopDeDupe can do for you, request a demo. Contact Brett Gurgel at [brett@whoopdedupe.com](mailto:brett@whoopdedupe.com) for info.

## List Conversion

WhoopDeDupe automatically converts many data formats including Excel spreadsheets, delimited text files, "fixed-width" (SDF) files, dBase tables, Word labels and tables, and even free text files.

## List Enhancement

WhoopDeDupe automatically standardizes and cleanses files, removes errors, and augments files with additional data. WhoopDeDupe assigns county and legislative districts in most states.

## List Match & Merge

WhoopDeDupe automatically combines up to 32 files at a time regardless of original file formats, and automatically identifies and merges duplicate records into more complete records.

## List De-Duplication

WhoopDeDupe automatically "dedupes" any file or combined file, and includes very sophisticated duplicate validation and report features. No other product can compete with our de-duplication.
